

UJI KOMPETENSI 1 PRODI TEKNIK INFORMATIKA

| | | |
|------------------------|---|------------------------------|
| Kode Mata Kuliah | : | 1865531 |
| MATA KULIAH | : | Pembelajaran Mesin |
| Nama Dosen Penguji | : | Dwi Normawati, S.T., M.Eng. |
| Materi yang diujikan | : | 1. Regresi 2. Naïve Bayes |
| Tanggal uji kompetensi | : | Selasa, 6 April 2021 |
| Ruang | : | Google Classroom |
| Sifat uji | : | (buka buku) |
| Waktu | : | 60 menit |

Petunjuk

- Jawablah pertanyaan di bawah ini pada lembar kertas dengan singkat dan jelas!
- Fotolah jawaban anda kemudian dan masukan pada lembar jawaban yang telah disediakan
- Lalu simpan dalam format .pdf kemudian diupload pada Google Classroom!
- Gunakan email UAD untuk mengakses Google Classroom!

| Materi | Pertanyaan | | | | | | | | | | | | | | | | | | | | | | | | |
|----------------------------|---|----------------------------|------------------------------|---|----|---|-----|---|----|---|----|---|----|---|----|---|----|---|----|---|-----|---|----|---|----|
| 1. Regresi | <p>Carilah persamaan regresi linier dari data berikut :</p> <table border="1"> <thead> <tr> <th>Usia Mobil dalam tahun (X)</th><th>Harga Mobil dalam dollar (Y)</th></tr> </thead> <tbody> <tr><td>5</td><td>85</td></tr> <tr><td>4</td><td>103</td></tr> <tr><td>6</td><td>70</td></tr> <tr><td>5</td><td>82</td></tr> <tr><td>5</td><td>89</td></tr> <tr><td>5</td><td>98</td></tr> <tr><td>6</td><td>66</td></tr> <tr><td>6</td><td>95</td></tr> <tr><td>2</td><td>169</td></tr> <tr><td>7</td><td>70</td></tr> <tr><td>7</td><td>48</td></tr> </tbody> </table> | Usia Mobil dalam tahun (X) | Harga Mobil dalam dollar (Y) | 5 | 85 | 4 | 103 | 6 | 70 | 5 | 82 | 5 | 89 | 5 | 98 | 6 | 66 | 6 | 95 | 2 | 169 | 7 | 70 | 7 | 48 |
| Usia Mobil dalam tahun (X) | Harga Mobil dalam dollar (Y) | | | | | | | | | | | | | | | | | | | | | | | | |
| 5 | 85 | | | | | | | | | | | | | | | | | | | | | | | | |
| 4 | 103 | | | | | | | | | | | | | | | | | | | | | | | | |
| 6 | 70 | | | | | | | | | | | | | | | | | | | | | | | | |
| 5 | 82 | | | | | | | | | | | | | | | | | | | | | | | | |
| 5 | 89 | | | | | | | | | | | | | | | | | | | | | | | | |
| 5 | 98 | | | | | | | | | | | | | | | | | | | | | | | | |
| 6 | 66 | | | | | | | | | | | | | | | | | | | | | | | | |
| 6 | 95 | | | | | | | | | | | | | | | | | | | | | | | | |
| 2 | 169 | | | | | | | | | | | | | | | | | | | | | | | | |
| 7 | 70 | | | | | | | | | | | | | | | | | | | | | | | | |
| 7 | 48 | | | | | | | | | | | | | | | | | | | | | | | | |

2. Naïve Bayes

Diketahui data training sebagai berikut:

| Tekanan darah | Kolesterol | Kadar gula darah | Potensi Stroke |
|---------------|------------|------------------|----------------|
| Normal | Tinggi | Tinggi | Ya |
| Normal | Normal | Tinggi | Tidak |
| Tinggi | Normal | Normal | Ya |
| Sedang | Rendah | Rendah | Tidak |
| Tinggi | Rendah | Rendah | Ya |
| Sedang | Tinggi | Rendah | Ya |

Pada kasus ini Potensi Stroke adalah kelas yang akan diprediksi menggunakan metode Naive Bayes. Tentukan potensi stroke pasien 1 dan pasien 2, jika diketahui pasien 1 dan pasien 2 memiliki gejala sebagai berikut :

| Pasien | Tekanan darah | Kolesterol | Kadar gula darah |
|----------|---------------|------------|------------------|
| Pasien 1 | Normal | Normal | Normal |
| Pasien 2 | Tinggi | Normal | Rendah |

Date

1) Regresi

$$* \text{Rata-rata } (x) = \frac{58}{11}$$

$$* \text{rata-rata } (y) = \frac{975}{11}$$

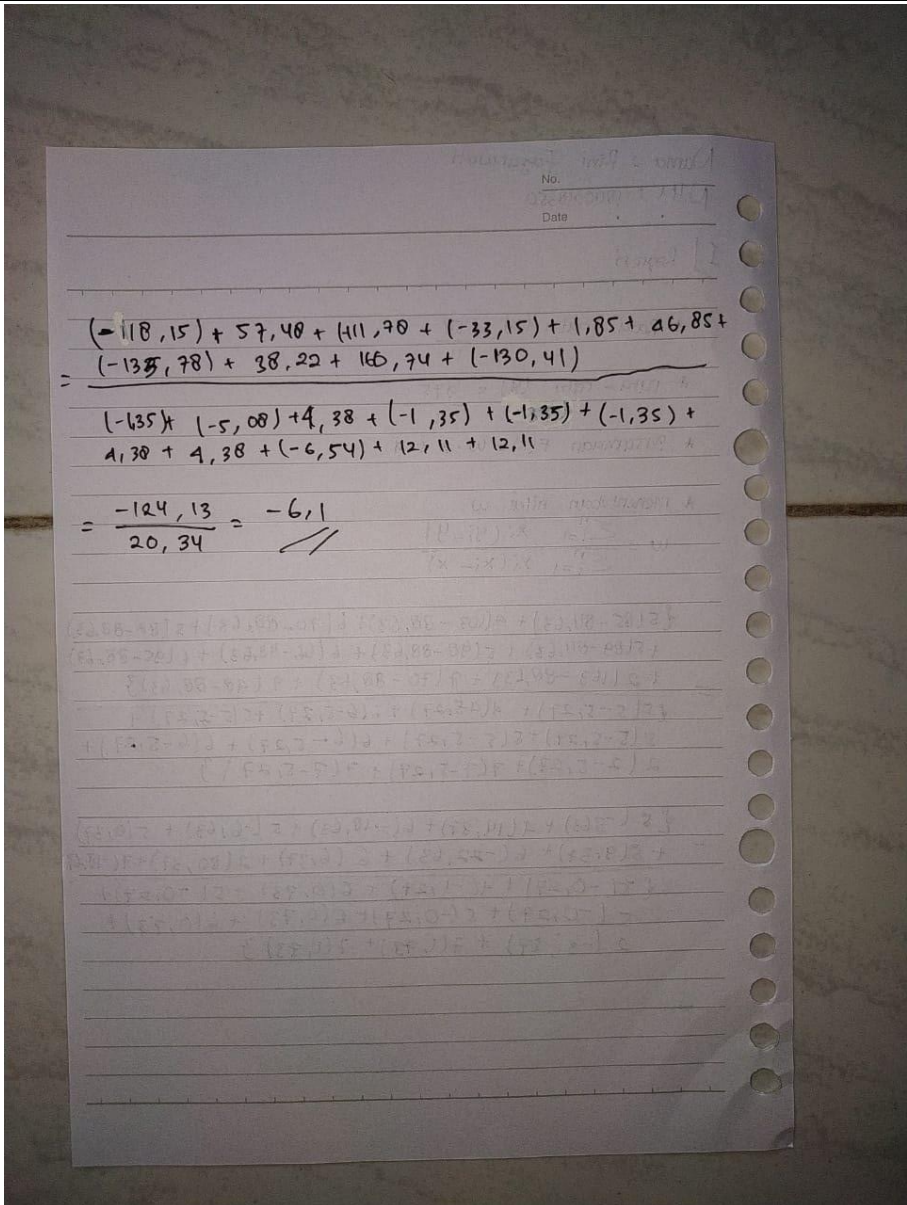

$$* \text{Persamaan } F(x) = w \cdot x + a$$

* Menentukan nilai w

$$w = \frac{\sum_{i=1}^n x_i (y_i - \bar{y})}{\sum_{i=1}^n x_i (x_i - \bar{x})}$$

$$= \frac{\{ 5(85 - 88,63) + 4(103 - 88,63) + 6(70 - 88,63) + 5(82 - 88,63) + 5(89 - 88,63) + 5(98 - 88,63) + 6(66 - 88,63) + 6(95 - 88,63) + 2(169 - 88,63) + 7(70 - 88,63) + 7(90 - 88,63) \}}{\{ 5(5 - 5,27) + 4(45,27) + 6(6 - 5,27) + 5(5 - 5,27) + 5(5 - 5,27) + 5(5 - 5,27) + 6(6 - 5,27) + 6(6 - 5,27) + 2(2 - 5,27) + 7(7 - 5,27) + 7(7 - 5,27) \}}$$

$$= \frac{\{ 5(-363) + 4(14,37) + 6(-18,63) + 5(-6,63) + 5(0,37) + 5(9,37) + 6(-22,63) + 6(6,37) + 2(80,37) + 7(-18,63) \}}{\{ 5(-0,27) + 4(-1,27) + 6(0,73) + 5(-0,27) + 5(-0,27) + 5(-0,27) + 6(0,73) + 6(0,73) + 2(-3,27) + 7(1,73) + 7(1,73) \}}$$

| No. Soal | Jawaban Peserta | Pencapaian | | Penilaian | |
|-------------|--|------------|---|-----------|----|
| | | Y | T | K | BK |
| |  <p> $(-118,15) + 57,40 + (111,70) + (-33,15) + 1,85 + 16,85 +$ $(-138,78) + 38,22 + 166,74 + (-130,41)$ $= (-135) + (-5,08) + 4,38 + (-1,35) + (-1,35) + (-1,35) +$ $1,38 + 4,38 + (-6,54) + 12,11 + 12,11$ $= \frac{-124,13}{20,34} = -6,1$ </p> | | | | |

2.

2) Naive Bayes

Pasien 1.

$$P(\text{yes}) = 4/6$$

$$P(\text{no}) = 2/6$$

Tekanan darah $P(\text{yes}) = 1/4$

$$P(\text{no}) = 1/2$$

kolesterol $P(\text{yes}) = 1/4$

$$P(\text{no}) = 1/2$$

kadar gula darah $P(\text{yes}) = 1/4$

$$P(\text{no}) = 0/2$$

* Yes

$$P(\text{yes} | \text{normal, normal, normal}) = \frac{P(\text{normal, normal, normal}) * P(\text{yes})}{P(\text{normal, normal, normal})}$$

$$P(\text{normal, normal, normal} | \text{yes}) = 1/4 * 1/4 * 1/4$$

$$= 1/64$$

$$P(\text{normal, normal, normal}) = 2/6 * 1/6 * 1/6$$

$$= 1/216$$

$$\therefore P(\text{yes} | \text{normal, normal, normal}) = \frac{P(\text{normal, normal, normal} | \text{yes}) * P(\text{yes})}{P(\text{normal, normal, normal})}$$

$$= \frac{1/64 * 4/6}{1/216} = \frac{9}{16} = 56,25\%$$

No. _____
Date _____

* NO

$$P(\text{no} | \{\text{normal, normal, normal}\}) = \frac{P(\{\text{normal, normal, normal}\} * P(\text{no}))}{P(\{\text{normal, normal, normal}\})}$$

$$P(\{\text{normal, normal, normal}\} | \text{no}) = \frac{1}{2} * \frac{1}{2} * \frac{1}{2} = 0$$

$$P(\{\text{normal, normal, normal}\}) = \frac{2}{6} * \frac{2}{6} * \frac{1}{6} = \frac{4}{126}$$

$$\therefore (\text{no} | \{\text{normal, normal, normal}\}) = \frac{P(\{\text{normal, normal, normal} | \text{no}\}) * P(\text{no})}{P(\{\text{normal, normal, normal}\})}$$

$$= \frac{0 * \frac{1}{2}}{\frac{4}{126}} = \frac{0}{\frac{4}{126}} = 0$$

\therefore Hasilnya adalah Yes karena 56,25% pasien 1 akan berpotensi stroke.

Pasien 2
 $P(\text{yes}) = 4/6$
 $P(\text{no}) = 2/6$

Tekanan darah = Tinggi
 kolesterol = normal
 kadar gula darah = rendah.

Tekanan darah $P(\text{yes}) = 2/4$
 $P(\text{no}) = 0/2$

kolesterol $P(\text{yes}) = 4/4$
 $P(\text{no}) = 1/2$

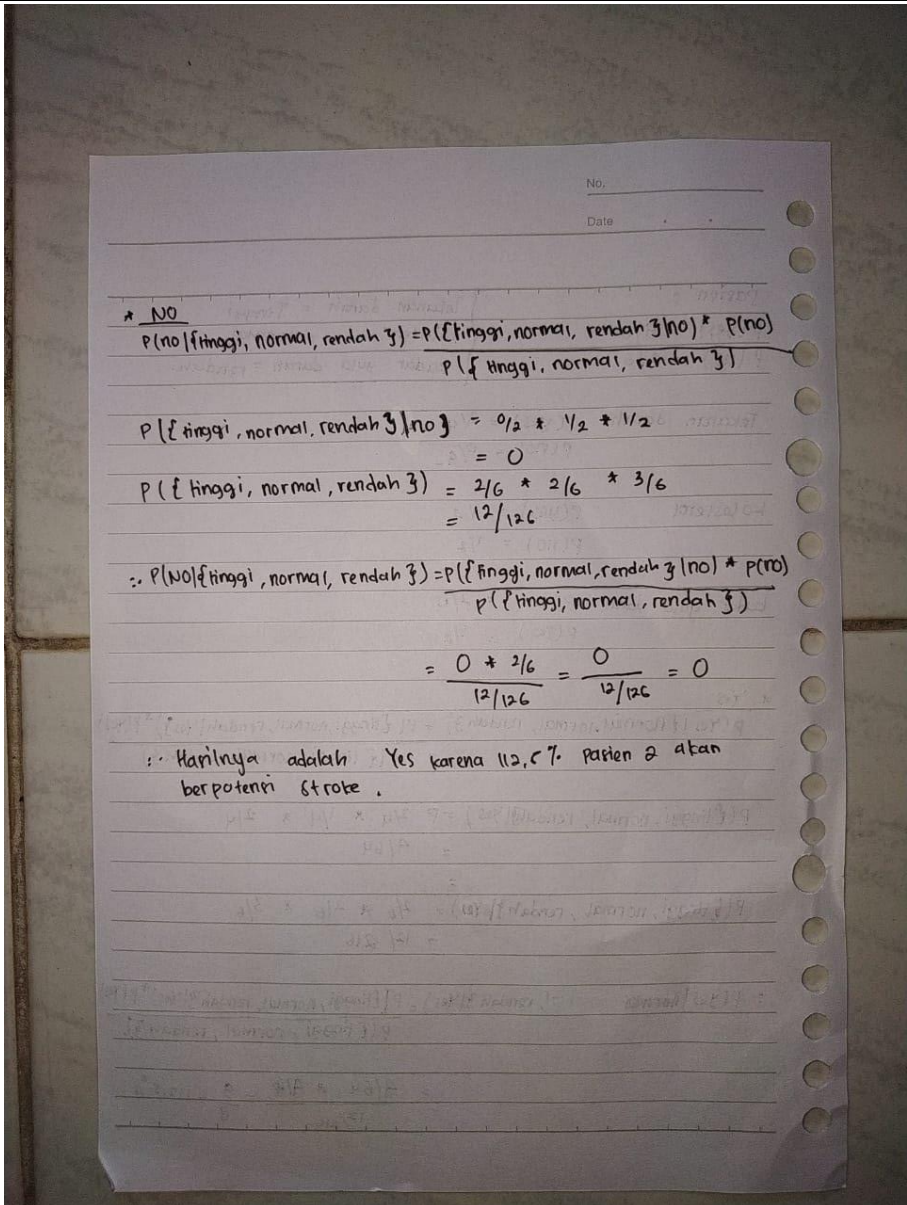

kadar gula darah $P(\text{yes}) = 2/4$
 $P(\text{no}) = 1/2$

$$* \text{Yes} \\ P(\text{Yes} | \text{tinggi, normal, rendah}) = \frac{P(\text{tinggi, normal, rendah} | \text{Yes}) * P(\text{Yes})}{P(\text{tinggi, normal, rendah})}$$

$$P(\text{tinggi, normal, rendah} | \text{Yes}) = \frac{2/4 * 1/4 * 2/4}{4/64}$$

$$P(\text{tinggi, normal, rendah}) = \frac{2/6 * 2/6 * 3/6}{12/216}$$

$$\therefore P(\text{Yes} | \text{tinggi, normal, rendah}) = \frac{P(\text{tinggi, normal, rendah} | \text{Yes}) * P(\text{Yes})}{P(\text{tinggi, normal, rendah})} \\ = \frac{4/64 * 4/6}{12/216} = \frac{9}{8} = 112,5\%$$
